

OMAR BENJELLOUN

| SAP Project Manager |
| ERP Implementation Expert |
| FI/CO Project Management Specialist |
| Senior Data Analyst / Business Intelligence |

12+ years of experience in SAP S/4HANA FI/CO, ERP implementation, financial transformation projects and Power BI reporting solutions.

PROFILE

SAP Project Manager leading the implementation and optimization of ERP solutions, particularly in FI/CO modules. I manage end-to-end project execution, from planning to go-live, ensuring successful delivery aligned with business needs. I also integrate Power BI dashboards and data analytics into SAP environments to drive real-time insights and improve strategic decision-making.

PROFESSIONAL EXPERIENCE

Slalom | 09/2023 - Present

SAP S/4HANA & POWER BI Project Manager, Paris - France

The Slalom project aims to modernize and optimize SAP solutions by implementing SAP S/4HANA to improve operational processes and data management. As a Project Manager, I remotely coordinate technical and functional teams across **4 offices in Germany, Ireland, UK and Netherlands**. I also oversaw the deployment of Power BI dashboards to improve operational performance tracking through integrated reporting.

Responsibilities :

- Requirement Scoping

- Leading workshops with internal and external stakeholders to gather business needs
- Writing detailed workshop reports and tracking functional requirements

- Interface Testing

- Managing and overseeing SAP S/4HANA interface testing to ensure system compliance and integration.
- Coordinating teams to validate data flows between SAP and other systems.

- Agile Support

- Monitoring agile reporting in Confluence for continuous project visibility.
- Assisting Product Owners in backlog management and user story prioritization

- Operational Management

- Leading operational and steering committees to ensure project timelines and performance objectives.
- Monitoring overall SAP S/4HANA project timelines and risk management.
- Tracking contractual indicators and cost estimates for SAP implementation.

- RUN Management

- Analyzing and addressing critical production issues in SAP.
- Establishing and leading task forces to resolve major production anomalies.

- BI Reporting Implementation

- Supervising Data Lake integration with SAP via APIs
- Designing and managing Power BI dashboards to enable automated monitoring of operational and financial performance

- Functional Domains

- Financial processes
- Internal operations management

Government of Canada | 09/2018 - 08/2023

SAP S/4HANA FI/CO & POWER BI Consultant, Vancouver - Canada

Involved from the early phases of SAP S/4HANA implementation, particularly in General Ledger, Accounts Payable, and Fixed Assets modules. Later, I ensured ongoing maintenance and support to sustain seamless processes across ministries and agencies.

I also implemented dynamic financial reports using Power BI, connected to SAP in order to enhance financial monitoring and decision-making.

Skills

- Leadership & Project Management
- Organization & Priorization
- Teamwork & Collaboration
- Problem Solving
- Agile Methodologies & Adaptability

Languages

- French : Avanced
- English : Avanced

Responsibilities :

From 2021 to 2023 : Consultant SAP S/4HANA FI/CO - Support, Maintenance, Power BI Reporting & Team Management

- Troubleshooting and resolving issues related to FI/CO modules
- Designing and documenting FI/CO functional enhancements
- Implementing FI/CO module enhancements
- Conducting unit, integration and regression testing for FI/CO updates
- Managing and coordinating a team of 4 people for support and enhancements
- Developing and maintaining Power BI dashboards to monitor key financial KPIs and support data-driven decision-making across departments

From 2018 to 2021 : Consultant SAP S/4HANA FI/CO - Implementation Project

- Preparing and facilitating business workshops.
- Writing detailed functional specifications.
- Configuring and customizing financial processes.
- Conducting unit and integration tests.
- Providing user support during UAT phases.
- Preparing training materials and conducting user training sessions.
- Defining and executing data migration strategies.
- Supervising data imports.
- Preparing and supporting go-live transitions.

Bell Canada | 09/2013 - 08/2018

Data Analyst, Montreal - Canada

At Bell Canada, I developed and automated financial reports using Power BI by setting up a SQL database connected to the SAP ERP system. This allowed business teams to monitor economic performance in real-time and optimize decision-making based on key indicators.

Responsibilities :

- Extracting and transforming data from SAP to feed financial reports and ensure reliable analysis
- Developing dynamic financial reports using Power BI for interactive data analysis.
- Automating financial reporting and optimizing SQL databases for real-time updates and data management.
- Analyzing performance trends and providing data-driven recommendations to enhance profitability and strategy.
- Collaborating with business teams to design and refine key performance indicators (KPIs).
- Building and managing analytical models to forecast financial results and propose optimization scenarios.
- Creating customized dashboards to support rapid decision-making.
- Training users on Power BI tools and analytical methodologies to ensure optimal adoption of solutions.
- Implementing data integration processes to improve the quality and consistency of analytical data.

EDUCATION

• 2021 | Poitiers - France

MSc. in Accounting, Audit and Management Control - IAE of Poitiers

• 2013 | Sherbrooke - Canada

MSc. Finance - University Of Sherbrooke
